## HOT IDEAS

VOLUME 10- WINTER

FEBRUARY 2009

### OIL HEAT IS CLEANER THAN EVER

According to American Petroleum Institute, oil heat has always provided a winning combination: high efficiency and low emissions. Now the latest in oil-fueled home heating systems are nearing zero emissions for smoke and combustion discharge. That means you get the most for your heating fuel money while helping to ensure cleaner air for your family, your community and generations to come.

### HOME HEATING OIL AND THE ENVIRONMENT

Here's a quick look at the environmental performance of today's high-efficiency home heating oil systems

- ◆ Residential oil burners produce less than one-third of one percent (.003) of total particulate emissions in the United States.
- ◆ The emissions from a home heating oil are about the same as those from a similar-size gas burner.
- ◆ New oil heating systems boast energy efficiency ratings ranging from 83 to 94 percent.
- ◆ Have an old heating system? *Call us for a **free** estimate for replacement.*

### OIL TANK PROTECTION:

*Why pay for an oil tank, when you can get one for **free**?*

Oil tank replacements can cost \$1,800 or more.

That is why we are offering our premium Tank-Guard insurance program. Tank-Guard protects the inside of your tank with a liquid corrosive inhibitor. Our Tank-Guard program gives you a comprehensive warranty that will provide a **free** tank replacement if your tank leaks from internal corrosion.

***Do not leave your tank 'unprotected' for another year.***

To sign up, fill out the form, below, & mail or fax back to us with your yearly premium of \$44.95 (per tank).

## TANK-GUARD Oil Tank Protection Program Enrollment Form

Please enroll my oil tank(s) in the TANK-GUARD Program. Enclosed is my check for \$44.95, per tank, for the TANK-GUARD and the one year warranty.

### AVALUX OIL ADDITIVE

As you already know, we do not deliver average heating oil, **we deliver premium oil.** We enhance ALL our oil with Avalux™ detergent additive. Avalux™ is a patented detergent additive, which will help your heating systems operate at peak efficiency, at no extra charge to you.

Your oil will burn cleaner and your heating system will last longer. This will save you money and Avalux™ is also good for the environment.

### BUDGET PROGRAM

Heating bills too high? Want to get your heating bill lower? Our "Smart Buy" budget payment plan may be able to help.

Please call the office to discuss how the "Smart Buy" budget program works. We can help you estimate what your monthly budget payment would be.

### EASY TIPS TO LOWER YOUR FUEL BILLS

- ◆ You can achieve conservation gains by weatherizing your home, i.e., installing the proper insulation in your house and around your hot water heater. Quick and easy fixes such as caulking and weather stripping windows and doors to seal out cold air also help save energy.
- ◆ Installing a programmable thermostat and reducing temperature settings on your thermostat, especially when you are not at home, are other ways to reduce your heating fuel costs. Our service techs can install a programmable thermostat in about an hour.

### WEATHER CAN AFFECT HEATING OIL PRICES

Did you know weather can squeeze a refiner's ability to meet demand for heating oil and contribute to higher prices.

- ◆ If summertime gasoline demand is greater than expected, refiners may need to delay producing heating oil. This may reduce supplies at the onset of cooler weather.
- ◆ Sudden increases in demand, caused by severe cold weather, will also cause prices to rise, as additional heating oil must be bought and transported from the Gulf Coast and/or Europe.
- ◆ Severe weather along Gulf Coast, such as hurricanes, can disrupt heating oil production. 47 percent of the nation's refinery capacity is located in the Gulf Coast region. In addition, terminals in that region receive 60 percent of crude oil imports to the United States.

## ***WE'LL KEEP YOU WARM....***

### PORT OIL SERVICE

Our high-trained, technical service department offers both general service/repair and emergency service / repair 24 hours a day, 7 days a week. We pride ourselves on our dedication and customer service to our customers.

We offer a yearly service contract on your heating unit, which not only covers your annual tune-up, it covers many other repairs or replacements. For more information on what is included on the contract, call our office or visit our website.
